

# NUC

INTERACTIVE DIGITAL  
WHITEBOARDING SOFTWARE

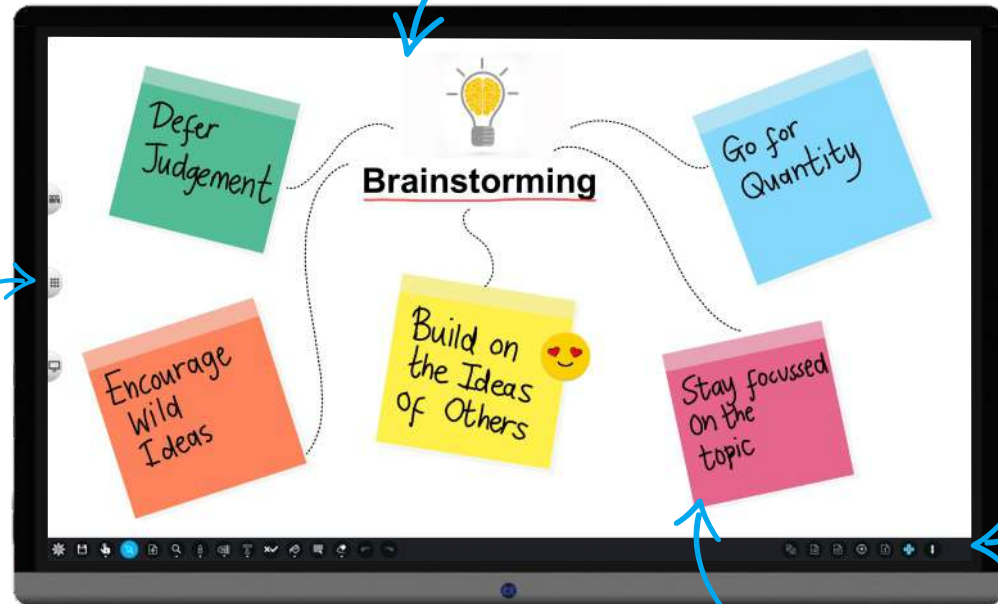

Nuc's infinite digital whiteboard page means there is no need to limit your ideas, move around the page easily, drag and drop images, video, and audio, add text and written notes and use the innovative mini apps to enhance content.

With lots of pens, lines, shapes, fills, page backgrounds and whiteboarding tools, the UI has been designed to make it intuitive for users to get working quickly.

Do what you need to do quickly with the navigator tabs.

Choose from different colour and styles of page backgrounds.

Quick access to pens, shapes, lines and page navigations

Walk into a room with an interactive touchscreen with Nuc installed and you don't have to worry if there's Microsoft Office installed - Nuc can import **Word, PowerPoint, Excel, and PDF**, content without having the original software installed, so you can share and annotate on your work easily without worry.

Nuc includes a clipart bank: from post-it notes, speech bubbles and emoji stickers to currency, periodic tables, food, flags and more.

We add clipart as part of our development of Nuc so if you have any suggestions please let us know. You can also add your own content to the bank.

# Don't like your handwriting?

Nuc includes handwriting recognition so you can convert your handwriting to editable text. You can also draw a shape freehand and convert to a tidy vector.

Want to work outside of the Digital Whiteboard page but still have access to Nuc tools? No problem, simply tap the side Desktop Mode tab and you'll move onto your Windows/Mac Desktop.

From here you still have access to Nuc annotation tools along with the screen recorder, screen capture and Maths tools. Annotate onto absolutely any file type/video/websites and save your work to refer to or copy back to Nuc to work on further.

LOTS MORE TO DISCOVER ASK FOR A DEMO

Nuc includes innovative Mini Apps that can help you to enhance your delivery and engage your audience. Make the most of your interactive touchscreen with these easy-to-use useful apps.

Here are some of our users favourites:

Magnifier

Magnify particular content on the screen to emphasise this to your audience and get their attention.

Board in Board

A fantastic pull-down area that is available outside of Nuc and allows you to make notes to refer to easily.

Screenshot

Screenshot any content visible on the screen and save as an image or PDF for easy reference or to share with your audience.

Split Screen

No separate pens required. Two users can write on the split screen, choosing their own pens and colors.

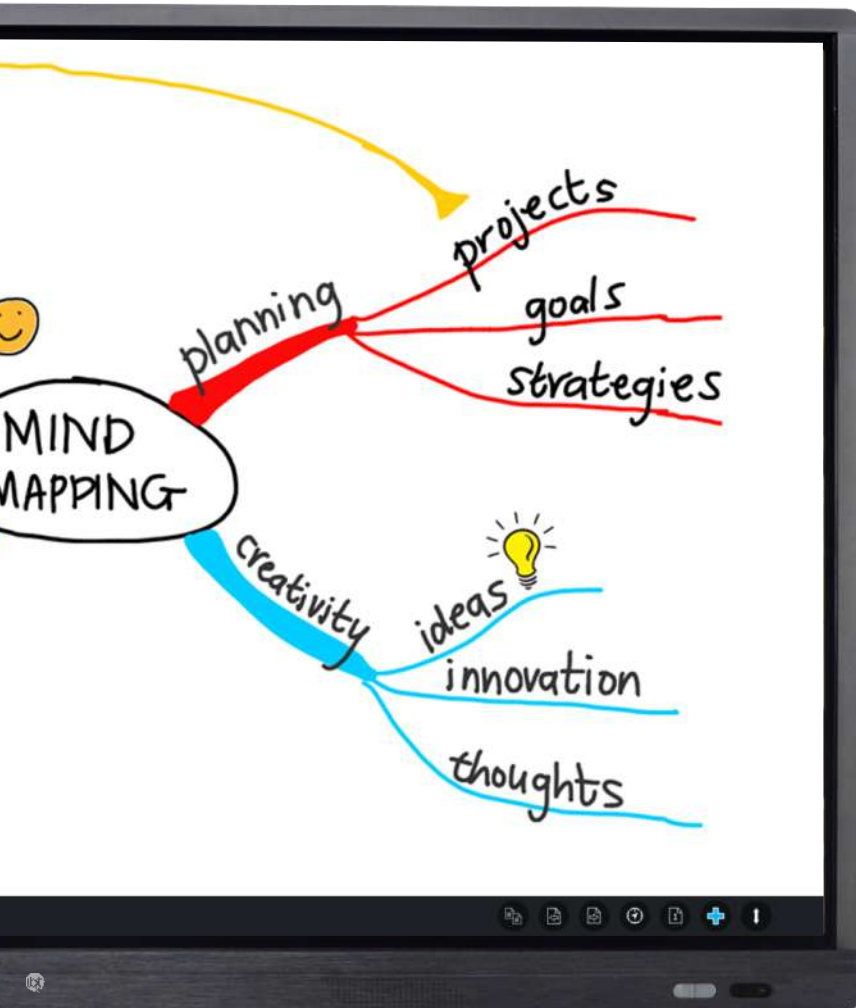

Page Replay

Replay a page you've created, great for going over concepts just discussed.

Screen Camera

Record all your interactions with the touchscreen (incl. audio). Perfect for creating revision or video tutorials.
