DUBAI INTERNATIONAL AIRPORT

CLIENT

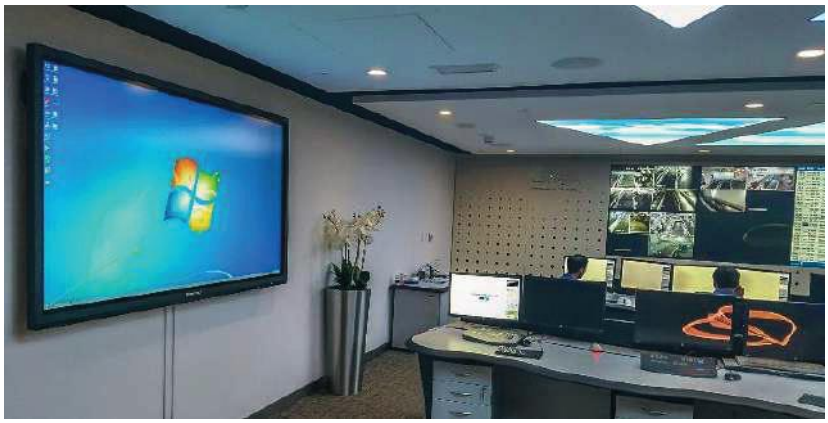
Dubai Airports
Connecting the World

Dubai International Airport is the primary international airport serving Dubai, United Arab Emirates and is the world's busiest airport by international passenger traffic. It is also the 6th busiest cargo airport in the world. There are over 7,700 weekly flights operated by 140 airlines to over 270 destinations.

THE REQUIREMENT

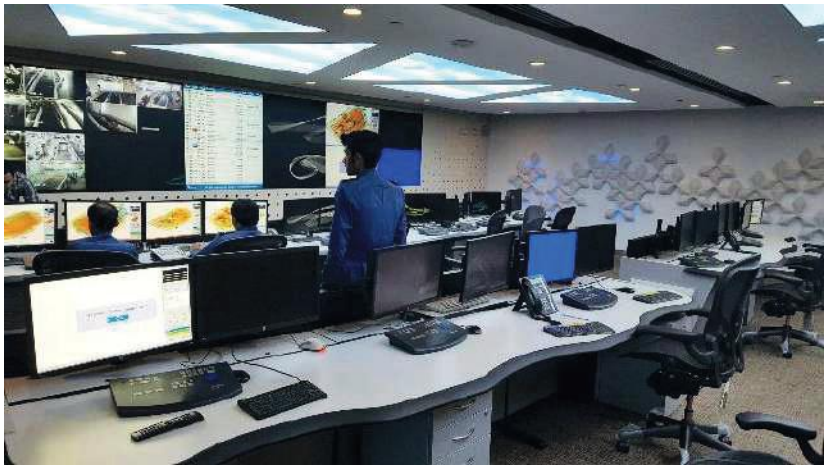
Dubai International Airport needed interactive touchscreens to use in the control room. Screen resolution was also a consideration as the client wanted video playback to be a high-quality experience.

THE SOLUTION



The reliability and durability of the V Series solution was the key reason for IBT to be chosen by the client.

IBT provided 84" interactive displays with integrated Windows PC modules providing the client with instant on and off. The touchscreens were mounted on the walls using fixed wall mounts. The software collection included IBT digital whiteboarding software (rebranded recently to Hive) and Windows Operating System.



"We were incredibly excited to be chosen for this project. Our Partner in U.A.E. gave the client a demonstration of IBT interactive displays and the feedback was extremely positive.

Our authorised installers worked with the client to deliver the project successfully."
