

WHY IBT FOR EDUCATION

Making an informed
decision

WHAT EDUCATORS SAY

“...it’s the first thing that goes on in the morning and the last thing that goes off before I go home.”

[DISCOVERIBT.COM](https://www.discoveribt.com)

Designed for everyone

IBT...

is a British technology brand that is leading the way in manufacturing complete touchscreen solutions - superb interactive displays built to last and software ideal for education.

For teachers used to traditional whiteboard projector systems, one of the benefits you'll notice first is that you no longer need to spend time calibrating, just walk up to the screen and start teaching.

We were also the first manufacturer to offer users transitioning from traditional projector systems the ability to use their existing Smart .notebook and Promethean files with all the layering and animation intact. Engage your students with new technology whilst still using valuable existing resources!

The heart of our solution

IBT offers you combined hardware and software this means that technical support for the hardware and the software is always handled promptly by a single company.

[DISCOVERIBT.COM](https://www.discoveribt.com)

Designed for everyone

Our interactive displays offer premium features without the premium price tag

MULTI-TOUCH

Our interactive displays allow up to 20 users to collaborate together on the touchscreen at the same time.

EASY-TO-USE

Pre-installed Android apps get you whiteboarding straight away. Super-easy to connect your own devices.

SUPER TOUGH

Interact without worry of damage. Super tough and hard wearing for demanding educational environments. How tough? At a recent demo we had a person stand on the screen to show just how strong.

REASSURING BUILD

Buy with confidence, our commercial grade panels have one of the lowest failure rates in industry

4K

4K DISPLAYS

Outstanding detail and stunning representation of your content. No need to turn of the lights.

INTEGRATED WINDOWS PC OPTION

Opt to integrate a quad core Windows PC directly into your IBT interactive display. Benefit from one touch on/off and no tangled wires and the most seamless, flexible and compact option if you don't want to connect your own PC or laptop. Use all the usual day-to-day software.

WRITING EXPERIENCE

Smooth, natural writing experience with our innovative tracking feature, the writing is precise and accurate.

Designed for everyone

Our easy-to-use subscription-free interactive whiteboard software

gives you easy access to your
cloud files

With Hive, access files directly from

Dropbox

Google Drive

One Drive

Simply drag them onto the digital whiteboarding page then use Hive's
embedded tools, pens and mini apps to
enhance your files and create
interactive classroom resources.

No need to have the original
software installed for popular
file types (PowerPoint, Word,
Excel, PDF), Hive does the
conversion for you!

SMART Exchange

Promethean

You can also use keywords to search for online resources
from SMART Exchange and Classflow and simply drag and
drop them onto the Hive page.

Software that opens your SMART & Promethean files in one step...

a seamless transition to modern, cutting edge touch technology

Open your Smart .notebook and Promethean files with all the layering and animations intact! Reassuringly familiar resources when you need them.

Using Hive also means you don't have to pay subscription fees for Smart or Promethean software. No need to have the original software installed, Hive does the conversion for you! You can also use keywords to search for online resources from SMART Exchange and Classflow and simply drag and drop it onto the Hive page.

ONE software

Hive was developed to offer educators ONE software for digital whiteboarding, collaboration, cloud integration, assessment delivery and more...

We are highly receptive to customer feedback. We've worked with a number of schools using Hive and Hive: Nexus Collaborate on software enhancement features and are very proud of being able to offer a software that responds to customer feedback:

Hive

Exceptional Interactive Whiteboarding Software.

Along with the usual pens, shapes, lines, page colours and tools, use powerful mini apps like **screen recorder** for evidencing, **page replay** to go over concepts just discussed, **board in board** to refer to aims and targets and **desktop mode** to annotate on absolutely any document. Open the resource bank and choose content from installed libraries or add your own content quickly and easily. Handwriting and shape recognition, visualisers, maths tools and more, Hive has market leading and comprehensive features. Why not ask for a demo.

Designed for everyone

Hive: Nexus Collaborate

Connect up to 40 iPads, Android tablets or Windows devices wirelessly to a Hive collaboration session. Choose a participant to collaborate on digital whiteboarding content with and just as easily take back control. Participants can also showcase their own work to the room.

Hive: Nexus Response

During a collaboration session start a response and send participants assessment pre-saved questions, feedback requests or votes. Facilitate whole class responses, perfect for engaging students who don't normally speak up. Responses are collated immediately after the response session finishes, perfect for you to gauge understanding and potentially tailor the rest of the session to cover 'weak' areas.

You can also send and receive files from participants - removing the need for using separate email services during a collaboration session saving you time.

iFlipChart

As simple to use as a pen, a simplified toolbar perfect for anyone who wants to make simple notes and drawings. Specially suited to younger children who can walk up to the interactive display and get started straight away, no orientation required. Pens, shapes, brushes, desktop annotation and resource bank all included!
