DISCOVERIBT.COM

Designed for everyone

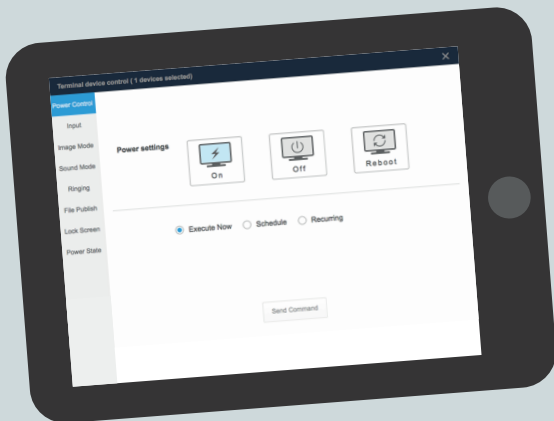

Remotely manage and control all your interactive displays with ease. Simply log into the system via a computer, tablet or mobile device.

Compatible with: Windows - MacOS - Android

Deploy software installations and resolve technical issues across your network without the need for user intervention.

Monitor devices to impose fair-usage policies and limit screen time. This way you can collate reports on the time and energy the interactive displays use.

Navigate to the device you want to control without any restrictions or limits. Easily access unattended workstations and servers for operational purposes.
